Wednesday Wreck Claims One Life; another hospitalized

Lenoir City Police Department confirms that Michael S. Walton, age 43, of Fort Wayne, Indiana died from injuries sustained in a motor vehicle crash. Mr. Walton and his wife Stephanie S. Walton, age 44, were travelling in a Ford Fusion, north bound on U.S. Hwy 321, near Fort Loudon Dam, when they collided with a Ford F-150 pickup truck which was travelling south bound driven by Brian A. Leach, age 21, at approximately 6:26 p.m. on Wednesday, September 9, 2015. Mr. Leach did not sustain any injuries resulting in hospitalization. Mrs. Walton was transported for injuries and her condition is unknown at this time.

The investigation is ongoing.

Report Examines How Tennessee High Schools Use Credit Recovery Programs

The Comptroller's Offices of Research and Education Accountability (OREA) has released a report that highlights how high school credit recovery programs operate in Tennessee, based on a survey conducted in partnership with the State Board of Education.

Credit recovery is a strategy that permits high school students

who have failed courses to recover course credits, allowing them to graduate.

Approximately 71 percent of the state's school districts with high schools responded to the survey earlier this year. Among the findings:

- Most districts with high schools provide a credit recovery option for stu-

(see Report pg. 4)

Internet of Things Poses Opportunities for Cyber Crime

The Internet of Things (IoT) refers to any object or device which connects to the Internet to automatically send and/or receive data.

As more businesses and homeowners use web-connected devices to enhance company efficiency or lifestyle conveniences, their connection to the Internet also increases the target space for malicious cyber actors. Similar to other computing devices, like computers or Smartphones, IoT devices also pose security risks to consumers. The FBI is warn-

ing companies and the general public to be aware of IoT vulnerabilities cybercriminals could exploit, and offers some tips on mitigating those cyber threats.

What are some IoT devices?

Automated devices which remotely or automatically adjust lighting or HVAC

Security systems, such as security alarms or Wi-Fi cameras, including video monitors used in nursery and daycare settings

Medical devices, such as wireless heart monitors

(see IoT pg. 3)

Verse of the Day

Without faith it is impossible to please God, because anyone who comes to him must believe that he exists and that he rewards those who earnestly seek

him. — Hebrews 11:6

Comptroller's Office to Host TIF Luncheon

The Tennessee Comptroller's Office is inviting public officials, financial and legal professionals, business leaders, developers and Tennessee citizens to a luncheon on Tax Increment Financing (TIF) on October 13, 2015 from Noon-1 p.m.

Tax Increment Financing is a tool used by local governments to clear blight or promote housing or economic development in tar-

geted areas using future property tax revenues.

The Uniformity in Tax Increment Financing Act of 2012 requires the Comptroller and the Commissioner of Economic and Community Development to review certain TIF plans. The purpose of the luncheon will be to explain the Comptroller's role in this process.

Newcomers will learn more about the TIF process, and experienced professionals will become

more informed about how the TIF Uniformity Act is being implemented.

The TIF Luncheon will be held in the James K. Polk State Office Building, 505 Deaderick Street, 16th Floor, Video Conference Center.

Attendees can register and bring their own lunch by sending

an RSVP to TIF.luncheon@cot.tn.gov by October 6.

Attendees can also register and receive a box lunch from Jersey Mike's by sending a \$10 check, made payable to "Comptroller of the Treasury," to Administration, Suite 1700, James K. Polk Building, 505 Deaderick St., Nashville, TN 37243 by October 6.

How do IoT devices connect?
 IoT devices connect through computer networks to exchange data with the operator, businesses, manufacturers, and other connected devices, mainly without requiring human interaction.

What are the IoT Risks?
 Deficient security capabilities and difficulties for patching vulnerabilities in these devices, as well as a lack of consumer security awareness, provide cyber actors with opportunities to exploit these devices. Criminals can use these opportunities to remotely facilitate attacks on other systems, send malicious and spam e-mails, steal personal information,

or interfere with physical safety. The main IoT risks include:
 An exploitation of the Universal Plug and Play protocol (UPnP) to gain access to many IoT devices. The UPnP describes the process when a device remotely connects and communicates on a network automatically without authentication. UPnP is designed to self-configure when attached to an IP address, making it vulnerable to exploitation. Cyber actors can change the configuration, and run commands on the devices, potentially enabling

the devices to harvest sensitive information or conduct attacks against homes and businesses, or engage in digital eavesdropping;
 An exploitation of default passwords to send malicious and spam e-mails, or steal personally identifiable or credit card information;
 Compromising the IoT device to cause physical harm;
 Overloading the devices to render the device inoperable;
 Interfering with business trans-

actions.
 What an IoT Risk Might Look Like to You?
 Unsecured or weakly secured devices provide opportunities for cyber criminals to intrude upon private networks and gain access to other devices and information attached to these networks. Devices with default passwords or open Wi-Fi connections are an easy target for cyber actors to exploit.
 Examples of such incidents:
 (see IoT ctd. pg. 7)

Report

dents in the high school grades.

Students are eligible for credit recovery after failing one or more high school courses that are required for graduation.

Districts that reported data for the survey served more than 7,600 students in credit recovery during the 2014-15 school year. Because some districts that provide credit recovery did not supply data, the actual total number of students in credit recovery was certainly higher.

Most districts' online credit recovery courses focus on areas of student deficiencies rather than requiring students to re-take entire courses. Some districts require all students to re-take complete courses.

Districts have different methods for grading students in credit recovery.

Critics have raised some concerns about credit recovery programs, citing a lack of basic statistical information about states' uses of credit recovery and a lack of evaluative research about the effectiveness of credit recovery programs. Other concerns include the potential for fraudulent use of credit recovery programs to impact district graduation rates, and little teacher involvement paired with greater student autonomy in some online programs.

In Tennessee, as in most states, credit recovery programs are designed and implemented at the district and school levels, with a modicum of

oversight by state education officials.

In an effort to provide more clarity around the administration of credit recovery courses, the State Board of Education is actively working to consider what additional policies or guidance may be needed concerning credit recovery.

To view the full report online, go to: <http://www.comptroller.tn.gov/OREA/>

Loudon County Sheriff's Office Toys for Tots 2015

Thanks to the generosity year after year of the Loudon County residents, churches, businesses and industries, the Loudon County Sheriff's Office is once again able to offer the Toys for Tots program. We are beginning our 31st year of providing toys to the needy children of Loudon County, and thanks to generous contributions of time, money and gifts, we are able to make Christmas a more joyful time for more and more children. In 2014, approximately 500

children were helped by the Loudon County Sheriff's Department Toys for Tots program through their partners. Even with the difficult economic times we are experiencing, we hope that the people of Loudon County will be there once again to help.

Beginning Tuesday, September 8, the 2015 applications will be available at the Loudon County Sheriff's Office. Applications will be accepted for children from Age 1 through 8th grade that are enrolled in the Loudon County or Lenoir City School systems. ALL applications must be returned to the Loudon County Sheriff's Department by 4 PM, THURSDAY, OCTOBER 22, 2015.

It is requested that everyone please submit their application as soon as possible. Applications must also include a copy of the parent or guardian's current income information. A current Tennessee Driver's License or State Issued ID is

required from the parent, and a copy of the child's social security card is also required.

Names will be available beginning in mid-October through business and churches. If you are considering helping a child this Christmas, please be assured that applicants are thoroughly checked to make sure they require this assistance. Names are also compared with the school systems to make sure no one is receiving duplicate assistance.

If your business or church would be willing to take names please call Debbie Hines, Toys for Tots Coordinator at 986-4823.

Obituaries

Lila T. Bollinger of the Tellico Village Community, Loudon, TN passed away unexpectedly on September 5, 2015 at Kindred Healthcare after surviving a bout with pneumonia. Lila was a Registered Nurse for more than 40 years. She and her husband, Robert, were founding residents of Tellico Village, moving here in 1987. Lila was preceded in death by her husband of 65 years, Robert (Bob) Bollinger in 2011. Survivors include her son, Craig (Annette) Bollinger of Cleveland, OH and daughter, Beth Bollinger of Tellico Village. No services will be held. In lieu of flowers, memorials may be

Team

Gabriel Garcia, 32, Maremont Parkway Loudon, was charged with DUI, Driving without a valid Driver License.

According to the report, Off duty Officer Range called in he was behind a possible intoxicated driver on Hwy 11 near the Justice Center.

Cpl. Billy Hall LCSO, caught up with

the vehicle in the area of Natalie Drive, and observed the vehicle over the fog line.

Deputy attempted to traffic stop vehicle, the vehicle slowed and driver kept reaching under the front passenger seat before coming to a stop. Traffic stop was made in front of Cole's Drive In, and contact was made with the driver Gabriel Garcia, who had an extremely strong odor of alco-

holic beverage emitting from his person. Observed in the front seat area was an open container of beer. Gabriel failed sobriety test, and could not produce a valid driver license.

Cpl. Billy Hall LCSO, made the arrest.

family of Lila Bolinger.

Mary L. Rice - age 82 of the Tellico Village Community, Loudon, TN passed away September 9, 2015. She was a warm, loving, kind and gracious wife, mother, grandmother, sister and friend to so many. She was devoted to and such a rock to her family. Mary was a member of The Community Church at Tellico Village where she participated in the

music program playing bells and singing in the choir. She loved to play the piano and shared her gift to the enjoyment of so many, including those living in a local nursing home. For many years, she was an avid square dancer, volunteered to keep up the garden at the entrance to Sequoyah Road and supported her community in a variety of ways. Mary graduated from Iowa State University, taught school and served as a medical laboratory technologist for many years. Preceded in death by her parents and her brother, John Grow. Survivors include her husband of 60 years, Dwight Rice, her daughter Pam Banning (Duane); her sons Mike Rice (Cathy) and Mark Rice (Kathy); grandchildren Rachel and Becky Banning, Christine Pitsenbarger, Eric Rice, Tim and Julie Rice; sisters Ruth Kenney-Randolph and Lucille Reichlinger; and many nieces and nephews. A Celebration of Life Service will be held on Friday, September 18, 2015 at 1:00 p.m. at The Community Church at Tellico Village. The family will receive friends immediately following the service. Burial will be private. In lieu of flowers memorials may be made to the Tellico Village Public Library, 300 Irene Lane, Loudon, TN 37774. Click Funeral Home & Cremations - Tellico Village Chapel is serving the family of Mary Rice.

Walter Barber of the Tellico Village Community, Loudon, TN passed away September 9, 2015. Arrangements are incomplete at this time.

DUI

The subject was identified as Stacey Buchanan, was driving West on Hwy 72 when her car ran up an embankment and came to a final rest on its top.

Upon contact Stacey speech was slurred and her action were over exaggerated. Stacey stated that she had taken a Suboxone this evening and 2 Xanax. Stacey was transported to Ft. Loudon Medical Center and cleared. Stacey was placed under arrest. Trooper James Capps THP, made the arrest.

IoT ctd. from pg. 3

Cyber criminals can take advantage of security oversights or gaps in the configuration of closed circuit television, such as security cameras used by private businesses or built-in cameras on baby monitors used in homes and day care centers. Many devices have default passwords cyber actors are aware of and others broadcast their location to the Internet. Systems not properly secured can be located and breached by actors who wish to stream live feed on the Internet for anyone to see. Any default passwords should be changed as soon as possible, and the wireless network

should have a strong password and firewall.

Criminals can exploit unsecured wireless connections for automated devices, such as security systems, garage doors, thermostats, and lighting. The exploits allow criminals to obtain administrative privileges on the automated device. Once the criminals have obtained the owner's privileges, the criminal can access the home or business network and collect personal information or remotely monitor the owner's habits and network traffic. If the owner did not change the default password or create a strong password, a cyber criminal could easily exploit these devices to open doors, turn off security systems, record audio and video, and gain access to sensitive data.

E-mail spam attacks are not only sent from laptops, desktop comput-

ers, or mobile devices. Criminals are also using home-networking routers, connected multi-media centers, televisions, and appliances with wireless network connections as vectors for malicious e-mail. Devices affected are usually vulnerable because the factory default password is still in use or the wireless network is not secured.

Criminals can also gain access to unprotected devices used in home health care, such as those used to collect and transmit personal monitoring data or time-dispense medicines. Once criminals have breached such devices, they have access to any personal or medical information stored on the devices and can possibly change the coding controlling the dispensing of medicines or health data collection. These devices may be at risk if they are

capable of long-range connectivity.

Criminals can also attack business-critical devices connected to the Internet such as the monitoring systems on gas pumps. Using this connection, the criminals could cause the pump to register incorrect levels, creating either a false gas shortage or allowing a refueling vehicle to dangerously overfill the tanks, creating a fire hazard, or interrupt the connection to the point of sale system allowing fuel to be dispensed without registering a monetary transaction.

Consumer Protection and Defense Recommendations

Isolate IoT devices on their own protected networks;

Disable UPnP on routers;

see IoT cont. pg. 8

IoT conc. from pg. 7

Consider whether IoT devices are ideal for their intended purpose;

Purchase IoT devices from manufacturers with a track record of providing secure devices;

When available, update IoT devices with security patches;

Consumers should be aware of the capabilities of the devices and appliances installed in their homes and businesses. If a device comes with a default password or an open Wi-Fi connection, consumers should change the password and only allow it operate on a home network with a secured

Wi-Fi router;

Use current best practices when connecting IoT devices to wireless networks, and when connecting remotely to an IoT device;

Patients should be informed about the capabilities of any medical devices prescribed for at-home use. If the device is capable of remote operation or transmission of data, it could be a target for a malicious actor;

Ensure all default passwords are changed to strong passwords. Do not use the default password

determined by the device manufacturer. Many default passwords can be easily located on the Internet. Do not use common words and simple phrases or passwords containing easily obtainable personal information, such as important dates or names of children or pets. If the device does not allow the capability to change the access password, ensure the device providing wireless Internet service has a strong password and uses strong encryption.
