Does Dried Fruit Count toward Your Daily Fruit Intake?

The Dietary Guidelines for Americans recommend people increase their fruit and vegetable intake. If you're struggling to meet your daily fruit intake, consider adding dried fruit to your meals. You can fulfill your nutritional

needs and add variety to your menu.

Dried fruit contains the same nutritional value of fresh fruit, with the possible exception of fiber, though dried fruit may be higher in calories due to its concentrated nature. One half cup of dried fruit is equal to one cup of fresh fruit so, as with everything, portion control is important with dried fruit.

Add dried fruit to cereal, trail mix, salads or other dishes. (From the American Dietetic Association)

Sauger

fishing.

Many anglers consider the sauger to be a mystery fish. They are looked on as being mysterious because most are taken in the winter months. Although a number of sauger are taken during the spring and summer months, over 90 percent of the sauger taken in Tennessee are caught from November through

March.

Tennessee is blessed with a number of good sauger areas and hundreds of miles of sauger habitat. It is difficult to predict peak fishing periods because the weather is the controlling factor, but the best results come on dark, overcast days.

The Tennessee Wildlife Resources Agency (TWRA) urges all sauger fishermen to be aware of the

weather conditions before planning any wintertime fishing trip. Remember to dress appropriately and practice good safety habits. Watch for signs of hypothermia. Above all, stay dry and be sure to wear your life jackets. Tennessee law requires that you wear your life jacket 1,000 feet below dams.

Be sure to check the current Tennessee Fishing Regulations for the creel and size limit for the body of water being fished. Fishing Regulations may be found wherever hunting and fishing license are sold and at all TWRA regional offices.
