CDC COVID-19 Study Shows mRNA Vaccines Reduce Risk of Infection by 91 Percent for Fully Vaccinated People
Vaccination Makes Illness Milder, Shorter for the Few Vaccinated People Who Do Get COVID-19

A new CDC study finds the mRNA COVID-19 vaccines authorized by the Food and Drug Administration (Pfizer-BioNTech and Moderna) reduce the risk of infection by 91 percent for fully vaccinated people. This adds to the growing body of real-world evidence of their effective-

ness. Importantly, this study also is among the first to show that mRNA vaccination benefits people who get COVID-19 despite being fully vaccinated (14 or more days after dose 2) or partially vaccinated (14 or more days after dose 1 to 13 days after dose 2).

COVID-19 vaccines are a critical

tool in overcoming this pandemic," said CDC Director Rochelle P. Walensky, MD, MPH. "Findings from the extended timeframe of this study add to accumulating evidence that mRNA COVID-19 vaccines are effective and should prevent most infections — but that

DUI

Corey Spoon, 28, Phelps Road Lenoir City, was charged with DUI, and Implied Consent.

Deputy Roger LCSO and Cpl Frye made came in contact with a white dodge ram in the parking lot of the Loudon County Justice Center as it parked in the Sheriff's designated parking spot. Deputy Swinney, then joined them in the parking lot. They came in contact with a Corey Spoon, who was known by previous encounters, and verified his identity by SSN and a valid license was confirmed through dispatch. The white dodge ram he was operating did not have its registration displayed but the vin check confirmed that it was registered to him. Mr. Spoon was sweating

excessively as well making incoherent statements. Deputy Rogers asked Mr. Spoon to perform SFST to which he consented. Cpl Frye and myself observed Mr. Spoon do poorly. Deputy then placed Mr. Spoon under arrest for DUI. Deputy placed him in the back of his patrol car and read Mr. Spoon the Tennessee Implied Consent and after asking several times and Mr. Spoon changing his answer, Mr. Spoon refused a Blood draw stating that he was going to try and fight the arrest. Moneymakers wrecker service towed the vehicle and Animal Control came and transported his dog to the shelter. Deputy transported Mr. Spoon to the Loudon County jail without incident. This did happen in Loudon County, TN.

CDC

fully vaccinated people who still get COVID-19 are likely to have milder, shorter illness and appear to be less likely to spread the virus to others. These benefits are another important reason to get vaccinated."

The findings come from four weeks of additional data collected in CDC's HEROES-RECOVER study of health care workers, first responders, frontline workers, and other essential workers. These groups are more likely to be exposed to the virus that causes COVID-19 because of their occupations. Preliminary results from this study were first announced in March 2021.

In the new analysis, 3,975 participants completed weekly SARS-CoV-2 testing for 17 consecutive weeks (from December 13, 2020 to April 10, 2021) in eight U.S. locations. Participants self-col-

lected nasal swabs that were laboratory tested for SARS-CoV-2, which is the virus that causes COVID-19. If the tests came back positive, the specimens were further tested to determine the amount of detectable virus in the nose (i.e., viral load) and the number of days that participants tested positive (i.e., viral shedding). Participants were followed over time and the data were analyzed according to vaccination status. To evaluate vaccine benefits, the study investigators accounted for the circulation of SARS-CoV-2 viruses in the area and how consistently participants used personal protective equipment (PPE) at work and in the community. Once fully vaccinated, participants' risk of infection was reduced by 91 percent. After partial vaccination, participants' risk of infection was reduced by 81 percent. These estimates included symptomatic and as-

ymptomatic infections.

To determine whether COVID-19 illness was milder, study participants who became infected with SARS-CoV-2 were combined into a single group and compared to unvaccinated, infected participants. Several findings indicated that those who became infected after being fully or partially vaccinated were more likely to have a milder and shorter illness compared to those who were unvaccinated. For example, fully or partially vaccinated people who developed

COVID-19 spent on average six fewer total days sick and two fewer days sick in bed. They also had about a 60 percent lower risk of developing symptoms, like fever or chills, compared to those who were unvaccinated. Some study participants infected with SARS-CoV-2 did not develop symptoms.

Other study findings suggest that fully or partially vaccinated people who got COVID-19 might be less likely to spread

Angry

David Rooke, 54, C Street Lenoir City, was charged with Domestic Assault.

Officers LCPD, were dispatched to a Domestic complaint where a 16 year old had been assaulted. Upon arrival, Officer spoke with the "David Rooke". He was sitting outside on the front porch. He stated his 16 year old son was supposed to be home at 10:00 this evening. He didn't come home until close to midnight. Victim started arguing with him and they started fighting.

Officer then spoke with victim. He was inside the residence in his bedroom. He had minor injuries to his face. It appeared he'd been punched and was crying.

Medics came and looked him over. He stated when he came home, His dad was waiting for him at the front door. He wouldn't let victim in, and started cursing him for being late. He tried to enter the house, his dad pushed him, and started hitting him.

Their Mom was awoken from all the commotion and went to see what was going on. She saw David hitting victim several times. She broke them up, locked themselves in a bedroom, and called 911. She said, David has a history of anger issues and becomes violent when he's mad.

David was arrested for Domestic Assault and transported to the Loudon County Jail.

This did happen in Loudon County.

Horoscopes

versal resonance. Projects that concern only your interests or that are of narrow scope no longer hold your attention.

Cancer 6/21-7/22

You could be seeing mirages at the moment, Cancer, most notably in the environment around you. You may have the impression that people are lying to you or that they're hiding something from you. Or it may be that you're the one who lies about certain things or hides what you do. Why are you making it all so complicated? Don't be afraid to express your feelings.

Leo 7/23-8/22

Hold on to your wallet, Leo, because you may have some strange (though noble) impulses to give away your money or spend a large amount on something useless. You should think about spending your money in a better way or not at all. Why not consider donating some of your time rather than money to those in need?

Virgo 8/23-9/22

Today isn't a good day to sign contracts or make any substantial purchases, Virgo. Go to the grocery store, by all means, but buy hamburger, not tenderloin. Keep your money at home and safeguard your reserves. Don't negotiate about anything. No matter how good the offer sounds or how compelling the deal, walk away.

Libra 9/23-10/22

Are you certain you can't

modify your current situation, Libra? Are you a prisoner of a lifestyle that isn't of your own making or is a throw-back to the past? People have been asking you to take on too many responsibilities and this is weighing you down. Don't be afraid to distance yourself from these situations. Learn to say no.

Scorpio 10/23-11/21

The forecast for you is excellent, Scorpio. You can rely on today's aspects to restore your self-confidence, which has been sorely tried during the past few days. The charismatic seducer in you can swagger forth, certain of conquest. However, don't go too far. Wait a while for reality to dispel the cloud of ecstasy and you will be able to see the future more clearly.

Sagittarius 11/22-12/21

You may have some trouble communicating today, Sagittarius. It's as though something is distorting your perception. Don't be surprised if once evening comes you feel like forgetting about everything and traveling to the other side of the world. Tomorrow you will see clearly again. Without a doubt, there are adventures in store for you!

Capricorn 12/22-01/19

You are radiant and glowing with happiness today, Capricorn! This is a refreshing change after the gloom of the past few weeks. Apparently, the decisions you made worked out for the best. Or

even better, perhaps you're in love? In any case, it will be even easier than usual for you to communicate with others and share your joy. Let the good times roll!

Aquarius 1/20-2/18

Your goal for today is to enchant your mate. There's no reason not to try. Indeed, it's an excellent day for love. But don't exaggerate your seductive wiles, Aquarius. Since the day's aspects tend to distort your perception of things, you may be deceived by what you see in the mirror. Be careful about what you do and how you do it!

Pisces 2/19-3/20

You're in splendid shape today, Pisces! Did a fairy godmother brandish a magic wand to dispel all the little difficulties of the past few weeks? Enjoy this moment of relief from worries. As for your love life, some exciting opportunities may arise. Be on the lookout for them. Whatever you do,

don't let them pass you by!

Aries 3/21-4/19

It's certainly clear that you have faith in your actions, Aries! You feel no fear or doubt as you progress toward your goals at a fast clip, cruising along on calm seas under clear skies. This new atmosphere is likely the product of your renewed commitment. Reward yourself for your accomplishments, but you should wait a few days before launching an all-out celebration.

Taurus 4/20-5/20

This is a moment to start being creative and stop worrying that you don't have talent, Taurus. Who's to say what "talent" is? In the romance department, the love of your life might be right under your nose. Try lifting your eyes from the romance novels and look around. The perfect mate could be any number of people in your daily life. You just have to open your eyes.

the virus to others. For example, fully or partially vaccinated study participants had 40 percent less detectable virus in their nose (i.e., a lower viral load), and the virus was detected for six fewer days (i.e., viral shedding) compared to those who were unvaccinated when infected. In addition, people who were partially or fully vaccinated were 66 percent less likely to test positive for SARS-CoV-2 infection for more than one week compared to those who were unvaccinated. While these indicators are not a direct measure of a person's ability to spread the virus, they have been correlated with reduced spread of other viruses, such as varicella and influenza.

Overall, the study findings support CDC's recommendation to get fully vaccinated against COVID-19 as soon as you can. Everyone 12 years and older is now eligible to get a COVID-19 vaccination in the United States. CDC has several surveillance networks that will continue to assess how FDA-authorized COVID-19 vaccines are working in real-world conditions in different settings and in different groups of people, such as different age groups and people with different health statuses.

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES

CDC works 24/7 protecting America's health, safety and security. Whether disease start at home or abroad, are curable or preventable, chronic or acute, or from human activity or deliberate attack, CDC responds to America's most pressing health threats. CDC is headquartered in Atlanta and has experts located throughout the United States and the world.
